DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a process of producing a wax composition.

Group II, claim(s) 6-13, 17-22, and 27-30, drawn to a wax composition.

Group III, Claim(s) 14 and 23, drawn to a moisture proof film.

Group IV, claim(s) 15, drawn to a laminate.

Group V, claim(s) 16, drawn to a container.

Group VI, claim(s) 24-26, drawn to a method of producing a laminate.

Restriction for examination purposes as indicated is proper because there is a lack of unity. The common technical feature is the wax composition of claim 7. This composition of a wax and a biodegradable amorphous polymer is known in the prior art (Hideyuki et al. JP 07-278510). Therefore there is not a special technical feature linking the claims.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement

may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that there is a unity of invention, applicant should submit evidence or identify such evidence now of record showing that there is unity of invention.
